Re: Intermittent City Closure

The severe rainstorm in Southern California today has affected in pipe leaking and floods which resulted in a city mandated traffic street closure on Alameda Street. Both our office and warehouse pick-up operations are limited with half-staffed and intermittent closures as streets are continued to be closed off by city officials.

Please kindly advise your clients of potential delays. Thank you for your patience and understanding.

We appreciate your continued business and support.

Sincerely,
Empire Container Freight Station Inc.
